I understand that Rick Albright's office is checking on North Star refinery. I've asked our Alaska office director about Moose Creek and have asked about Dennis' calendar. If the subjects become any clearer, please let me know.

Dan, that would be great. Cindy, do you want to check on Dennis' Calendar? If he would like to do it, we could work around his schedule. My thought, for time efficiency is to schedule on meeting time for Rep. Wilson, and the program folks would only have to be there for their part.

Setting aside the substance for now -- the descriptions so far don't bring to mind things with which I am personally engaged -- I will be in DC on March 4, as will Dennis McLerran. I am reluctant to speak to Dennis' calendar, but I could probably work in some time to spend with Rep. Wilson.

Jack and all,

R10 Public Affairs Director Marianne Holsman and I often arrange R10 participation in meetings like this. I was out of the office on Friday, and it appears that this message did not go to Marianne. In any case, if someone can let me know what has already been arranged and what is still needed from R10, I would be happy to help.

Ed, Rick, Dan and others -

There's a string of emails below speculating about which sites Alaska State Rep. Tammy Wilson would like to come talk to EPA about when she's in DC on Friday March 4. Do you guys have any insights to help us figure out which sites specifically she might be talking about, whether they're RCRA, Superfund, or Tank sites, and what the concerns are? Any thoughts would be particularly helpful in making sure we send the right people to the meeting and are adequately prepared.

Appreciate your help!

- Carolyn

Jack - not sure if these are the sites in blue you are referring to. OUST and OSRTI, please consider Jack's request below.

the Moose Creek site is apparently a military cleanup of pipeline contamination, (contaminants include GRO, DRO, Benzene, Toluene, ethylbenzene, zylene).

Maybe this Underground Storage Tank issue? <http://www.dec.state.ak.us/spar/csp/sites/moose.htm>

The North Star Site is a refinery and residents have been given new sources of drinking water and a new filtration system (the contaminant is Sulfolane). The staffer didn't know if this was a SF site or what.

Maybe this site - <http://www.dec.state.ak.us/spar/csp/sites/north-pole-refinery/documents.htm>

Subject: Fw: Scheduling Rep. Wilson from Alaska

OSWER friends:

Alaska State Rep. Tammy Wilson is her in DC next week and would like to set up a few meeting with EPA on Friday March 4 .

Her haz waste issues involve a couple of sites -- Moose Creek and North Pole -- and a variety of contaminants (I will get more detail). She had to go before she could tell me whether these are Superfund sites or not, but her main concern seems to be cleaning up the contamination. Her District borders Fairbanks but is no doubt quite large.. Whom do you recommend she meet with or do you need more info? It doesn't have to be high level - branch chief would be ok.

Subject: Scheduling

Good afternoon,

Representative Tammie Wilson would like to schedule a meeting with EPA regarding air quality issues, Sulfolane contamination, cleanup of contaminated sites and white fish concerns in regards to the Tanana Bridge.

This will most likely involve more than one department of the EPA. I have been working on scheduling this meeting but it has been a bit cumbersome for me. Your assistance will be greatly appreciated.

Sincerely,

Vivian
